

Delayed Harvest Waters

These are stocked trout waters open to fishing year-round, but trout caught between October 1 and the first Saturday in June must be immediately released. You cannot keep or have in your possession any trout while fishing these waters during this time. Single-hook, artificial lures or flies are required during the October-June period. Beginning the first Saturday in June, harvest of trout from these waters is allowed, and anglers can use natural bait. "Hatchery Supported" trout regulations apply during this time. Beginning October 1, these waters revert back to "Delayed Harvest" trout regulations. Harvest of trout is again prohibited and anglers must use single hook artificial lures or flies. Here is a breakdown of the Delayed Harvest Regulations:

From October 1, 2005 to June 2, 2006:

- You may only use single hook artificial lures
- No fish may be harvested or possessed
- No fishing allowed at all between 1/2 hour after sunset on June 2, 2005 and 6:00 am on June 3, 2006

From July 1, 2005 to September 30, 2005 and from 6:00 am, June 3, 2006 to June 30, 2006:

- The stream is now under the "Hatchery Supported" regulations
- No bait restrictions
- No minimum length limit
- Seven (7) trout per day creel limit.
