

Nymphing Techniques - This lesson format will cover the techniques used to effectively and consistently catch trout on nymphs. Learn specialty casts, complex mends, high-sticking, using manageable slack and making slack line presentations, the proper use of weight and strike indicators, the Leisenring lift, making presentations at all angles— up, up and across, across, across and down, and down. Also, I will teach you that a drag free drift is just as critical as in fishing a dry fly, and how most anglers assume they are getting good drag free drifts and they are not. Experience catching more trout with unquestionably fly fishing's most effective method for catching trout in all streams in all places. This lesson normally is a 3-4 hour lesson, and is available by appointment just like the other lessons, and from 6:00am -8:00pm.
